MR LUYOLO MAHAMBA
071 006 6573 | luyolomahamba7@gmail.com | Johannesburg, Gauteng | Portfolio: https://luyo-portfolio.netlify.app/

CAREER OBJECTIVE

Aspiring Front-End Developer with a background in Mathematics and Chemistry and strong interest in scalable software design, UI development, and application logic. Passionate about front-end technologies, user experience, and mobile/web development. Currently studying BSc at the University of Johannesburg, I seek to contribute to innovative software teams through entry-level or internship roles, while growing technical and professional capabilities in a dynamic environment.

EDUCATION

Senior Certificate (Matric)
School: Sithukuthezi Secondary School

Bachelor of Science in Chemistry and Mathematics University: University of Johannesburg Duration: 2023
-Expected Completion 2026 Key

Modules:

- Calculus I & II (Rates of change, optimization, integrals)
- Linear Algebra (Vector spaces, matrices, and systems of equations)
- Differential Equations (Mathematical modelling and forecasting)
- Inorganic & Physical Chemistry (Critical reasoning and system analysis)
- Organic Chemistry
- Introduction to Algorithm Development (C++)
- Introduction to Data Structures (C++)

- Object-Oriented Programming (Java)
- Data Communications (Java)

PROJECTS

Inventory Management System (IMS)

Developed a JavaFX desktop application to help small businesses manage products, suppliers, and transactions.

- Designed intuitive UI with Scene Builder
- Built core features for managing inventory, transaction logging, and supplier tracking
- Integrated a MySQL database with JDBC, ensuring data integrity and persistence
- Implemented robust error handling and input validation

Tech Stack: Java, JavaFX, JDBC, MySQL, Scene Builder
GitHub: github.com/Luyo200/Inventory-Management-System

SKILLS

Mathematical & Analytical Skills

- Strong foundation in functions, calculus, and systems modelling
- Analytical problem-solving using algebraic and logical reasoning
- Confident interpreting mathematical structures and trends in data
- Solid grasp of physics concepts to support quantitative analysis

Programming & Technology

- **Languages**: Java, C++, JavaScript, HTML, CSS
- **Frameworks**: JavaFX
- **Tools**: GitHub, Eclipse, VS Code, Scene Builder, Notepad++
- **Microsoft Office**: Word, Excel, PowerPoint

Soft Skills

- Detail-oriented and reliable, thrives in teams and excels independently.
- Eager to learn and adapt quickly in dynamic environments

Languages

- Fluent in English, IsiZulu, and IsiXhosa

INTERESTS

- Front-end & mobile development (React Native, JavaScript)
- Building real-world applications using math & logic
- UI/UX design, automation tools, and clean code architecture
- Exploring fintech, cloud-based tools, and digital transformation
